

**GUEPARD®**

## **A passion for “la petite reine” for several generations.**

Philippe Van Eekhout and Jean-Luc Moerman started GUEPARD to make their dream a reality: to create unique bicycles leaving absolutely nothing to chance.

Every GUEPARD bike is made to measure in a traditional workshop in Belgium. The GUEPARD workshops has been visited by plenty of famous names already, including Gerrie Knetemann, Hennie Kuiper, Peeters Ludo Janssen, Jan and Nico Emonds and Ernesto Colnago.

Every new GUEPARD is worked on with incredible attention to detail by Philippe Van Eekhout, the vital link between the customer and the workshop. From the feasibility study through to personalising the bike, not forgetting quality control, nothing is left to chance. A peddler in every sense of the word, Philippe tracks down the rarest genuine, high-tech parts both in Belgium and further afield.

A GUEPARD bicycle is designed and put together by Jan, who combines sophistication, lightness and quality for every single creation. A former racing cyclist, Jan has won many trophies throughout his career.

The GUEPARD's markings are done by hand, directly on the frame, making each piece totally unique. This final touch is added by Jean-Luc Moerman, a Belgian artist who used to race fixed-gear bikes in New York in the 1990s. His personal collection of track bikes is pretty impressive.

## **Get your hands on your own new ride in 3 easy steps.**

1) Establish a relationship with someone you can trust: at GUEPARD you deal directly with the brand's cofounder, Philippe Van Eekhout. He is dying to share his passion for bikes with you and will help you come up with your very own made-to-measure GUEPARD.

2) Create your very own rare species: your GUEPARD is a unique bicycle, tailored to your body, your demands, and above all, your desires. Lovingly sculpted by a master craftsman, your GUEPARD is put together with incredible skill in a traditional workshop by an expert who knows his craft inside out.

Most of the parts used to create your GUEPARD are original Vintage parts in perfect condition or never used.

To add an additional stamp of individuality, the marking for your GUEPARD is also unique, hand-painted by artist Jean-Luc Moerman. It means that your steed will really stand out from the pack, and transforms every bike into a work of art.

3) Tame the beast: your GUEPARD is ready to be trained. Once we've delivered it to you we'll make the final adjustments to make sure you can get the most out of your new GUEPARD.

## **The 20 series.**

The 20 series is a GUEPARD collection with just 20 unique editions.

Each bike in this series is 100% made-to-measure: the dimensions of the frame, the silhouette, the colours, the parts and the markings are all totally unique.

All of the parts used in this series are authentic vintage parts that have never been used before. There are only 7 GUEPARDs left in this series
